

ABBEmpresas::agregarPrecio

ABBEmpresas::inicializar
Empresas

MultilistaPrecio::agregar
Precio

```
graph LR; A[ABBEmpresas::agregarPrecio] --> C[MultilistaPrecio::agregar Precio]; B[ABBEmpresas::inicializar Empresas] --> C;
```

The diagram illustrates a dependency or inheritance relationship. Two methods from the `ABBEmpresas` class, `agregarPrecio` and `inicializar Empresas`, are shown in white boxes on the left. Arrows from these boxes point to a single method, `MultilistaPrecio::agregar Precio`, which is shown in a gray box on the right. This suggests that both methods in `ABBEmpresas` rely on or delegate the task to the `agregar Precio` method in the `MultilistaPrecio` class.
